

PROFESSIONAL SUMMARY

L2 Service Desk Engineer with 5+ years resolving complex incidents across healthcare, banking and enterprise environments. Deep expertise in Oracle SQL, Microsoft 365 administration, Active Directory, Windows Server 2019/2022 and Linux shell operations. Cut repeat tickets by 30-40%, reduced mean-time-to-detect server issues from 45 min to under 5 min, and automated manual reporting that once consumed hours every week. Built for a global service desk that demands precision, clear documentation and zero tolerance for recurring problems.

CORE COMPETENCIES

Oracle / SQL	Multi-table JOINS - subqueries - window functions (ROW_NUMBER, RANK, LAG/LEAD) - CTEs - stored procedures - parameterised queries - execution plan analysis - index-aware query optimisation - bulk DML operations
Microsoft 365	Exchange Online hybrid config - mail-flow rules - SharePoint permission inheritance - Teams voice policies - Intune compliance baselines - Azure AD RBAC - Conditional Access named locations - Graph API automation
Linux / Shell	Bash scripting - cron scheduling - systemd unit management - journalctl - grep/awk pipelines - SSH tunnelling - rsync backups - logrotate - CentOS and Ubuntu server hardening
Windows Server	AD DS forest/domain design - Fine-Grained Password Policy - GPO WMI filtering - DHCP failover - DNS split-brain - DFS-R replication - Hyper-V snapshots - PowerShell remoting
Networking	OSI layer diagnostics - TCP/IP subnetting - VPN split-tunnelling - firewall ACL analysis - Wireshark packet capture - VLAN trunking - DNS recursive resolution debugging
Automation	Python (requests, smtplib, schedule) - PowerShell DSC - Azure Functions HTTP triggers - REST API integration - Slack and Teams webhook alerting - Oracle reporting pipelines
Incident Mgmt	ITIL 4 service value chain - 5-Whys/Ishikawa problem management - P1 major-incident coordination - post-incident review - SLA breach prediction - change advisory board
Reporting & BI	Power BI DirectQuery + scheduled refresh - Microsoft Graph API extraction - Python-generated PDF reports - KPI dashboards for licence utilisation, MTTR and SLA compliance

PROFESSIONAL EXPERIENCE

Healthcare Australia

2nd Level Service Desk Support Engineer (L2) | Melbourne, VIC | Nov 2024 - Present

- Author and maintain Oracle SQL stored procedures and parameterised reporting queries - multi-table JOINS, window functions (ROW_NUMBER, LAG/LEAD), CTEs and aggregation pipelines - against live operational databases to surface licence utilisation, incident trends and SLA compliance data.
- Administer Microsoft 365 end-to-end: Exchange Online, SharePoint, Teams call quality, Intune device compliance, Azure AD conditional access and full identity lifecycle management.
- Manage Active Directory at scale - provisioning/deprovisioning, GPO creation and troubleshooting, group membership audits and stale-account remediation across a 5,000+ employee organisation.
- Use Linux shell (SSH, tail, grep, awk) daily on Ubuntu monitoring servers - cut root-cause analysis time for network tickets by ~60%.
- Led after-hours P1 authentication outage response - coordinated vendors and senior engineers, restored service within SLA, authored post-incident runbook preventing recurrence.
- Rebuilt knowledge base with plain-English structured articles; reduced repeat M365 tickets by 30% within 90 days.
- Maintain HIPAA-adjacent compliance posture: endpoint patching, device encryption verification, backup integrity checks and compliance documentation.

Office Choice Ltd

IT Support Analyst (L1/L2) | Melbourne, VIC | Dec 2023 - Nov 2024

- Sole L2 escalation for 50+ SMB clients; owned all SQL reporting, server administration and M365 troubleshooting.
- Built parameterised Oracle SQL reporting scripts - aggregations, date-range filters, trend analysis - delivering weekly incident reports; cut manual effort from 3 hrs to under 20 min.
- Led zero-downtime migration of 30 users from on-premises Exchange to M365 - weekend cutover, zero data loss.
- Built Python + bash monitoring scripts catching disk-space and service-failure events before escalation; eliminated three recurring weekend P1s.
- Trained end users and authored quick-start guides consistently praised by client managers.

Melbourne Institute of Technology

System Support Assistant | Melbourne, VIC | Jul 2022 - Oct 2023

- Multi-campus IT support for 2,000+ students and staff - desktop, network, AV, LMS and Zoom infrastructure.
- Used Linux shell to troubleshoot CentOS print and lab servers; converted institutional memory into runbooks used by all future support staff.
- Managed Windows Update Group Policy across 200+ shared lab endpoints; maintained 100% patch compliance.

Emirates National Bank of Dubai (Emirates NBD)

Junior IT and Systems Support Consultant | Dubai, UAE | Jan 2021 - Oct 2022

- First-line and escalation support for 3,000+ banking staff - zero-tolerance P1 environment where response time was measured in minutes.
- Designed Oracle SQL extraction queries with date-partitioned filters and audit-trail joins to pull transaction logs for compliance reporting; met all regulatory submission deadlines.
- Operated within strict access-control frameworks; change management, approval chains and compliance documentation part of every action.
- Collaborated across infrastructure, network and database teams to resolve cross-domain incidents.

KEY PROJECTS

Oracle SQL Reporting Suite

Stored procedures with parameterised date-range inputs, window functions for trend deltas and CTE-based SLA breach detection. Python wrapper auto-generates and emails a formatted PDF report weekly - cut manual effort from 3 hrs to under 15 min.

Linux Log-Monitoring and Alerting

Bash script tailing Ubuntu server logs; Slack alerts on error-pattern match + auto log-rotation. Mean-time-to-detect: 45 min to under 5 min.

Self-Service Password Reset Portal

Azure Functions + React + Twilio SMS. Removed ~40% of password-reset tickets in month one.

M365 Tenant Health Dashboard

Power BI pulling from Microsoft Graph API - mailbox sizes, licence utilisation, Teams activity, SharePoint storage. Half-day manual reports now refresh on schedule.

Network Diagnostics Toolkit

PowerShell menu-driven scripts: ping, DNS, port-connectivity, DHCP lease checks. Team default first-response tool for network tickets.

EDUCATION

Master of Business Analytics | Data-Driven Decision Making and Business Intelligence | Graduated with Distinction

Bachelor of Computer Science Engineering | Software Development, Algorithms, Database Systems, Networks

CERTIFICATIONS

Microsoft 365 Certified: Endpoint Administrator Associate (2024) | Microsoft Azure Fundamentals AZ-900 (2024) | ITIL 4 Foundation - AXELOS (2024) | CompTIA ITF+ (2024) | Google IT Support Professional (2024) | CompTIA Security+ (*In Progress*) | Cisco CCNA (*In Progress*)
